SC

SECRET

No. 1080-W, 4

GOVERNMENT OF INDIA, WAR DEPARTMENT (ARMY BRANCH).
NEW DELHI, the 27th January, 1943.

To
All Provincial Governments.

Sir,

I am directed to address you on the very urgent need for obtaining much larger numbers of youths of the "matriculate" and the "semi-educated" zones (particularly of the "matriculate" zone) for training as technicians for the Defence Services, especially for the Indian Air Force. The "matriculate" zone comprises those who have passed the matriculation examination or are studying in IX and X classes and the "semi-educated" zone comprises those who are studying in the IV to VIII classes.

2. In Labour Department's letter No. TRA-463, dated the 30th December 1941, and subsequent letters, certain suggestions were made which it was hoped would speed up recruitment for the technical training scheme. All Provinces have set up organizations for this purpose. This letter is not intended to interfere with any such arrangements, but merely to ensure that those arrangements are extended and enlarged where necessary to deal with the special problem of accelerated recruitment of youths of the "matriculate" and the "semi-educated" zones.

3. At present the average monthly intake of recruits for training as technicians for the Army, Navy and Air Force in the "matriculate zone" is approximately 630 a month against the present requirement of 2100 and a probable future requirement of 3000 which may rise as high as 4000, while the intake in the "semi-educated" zone is in the neighbourhood of 1200 a month against the present requirement of 1600 and a probable future requirement of 2300. Recruitment in the "matriculate" zone must, therefore, be increased approximately six-fold and in the "semi-educated" zone approximately two-fold. These figures indicate the magnitude of the problem which faces the Government of India, the rapid and successful solution of which is essential if the fighting forces particularly the Indian Air Force are to be expanded in accordance with the needs of the situation.

4. This problem has been receiving the most anxious consideration and the Government of India suggest, that if the Government of Madras/etc. see no objection, they should formulate plans, based on the suggestions which are made in paragraphs 5 to 8 of this letter - modified as may be necessary for local conditions - for propaganda in schools and colleges, which are the recruiting grounds for the personnel required, and put them into effect with the least possible delay.

5. The Government of India are of opinion that the best method of making an approach to High Schools is to utilize to the fullest possible extent the inspecting staff of the Provincial Education Department. A strong directive should be issued by the Director of Public Instruction to the inspecting staff, urging upon them that they should visit High Schools as often as possible and do all they can to ensure that Headmasters or senior teachers of schools continuously impress on the students the benefit of a technical career in the Armed Forces and its post-war value in industry. Such a directive should emphasise the need for the educational staff to look upon this work as one of first rate importance and throw themselves whole-heartedly into it. It would stimulate efforts if it were made known that good work done in this matter would receive some sort of suitable recognition. If the Government of Madras/etc. consider that the amount of work which this would require from the inspecting staff is such that it cannot be performed efficiently by the existing staff, it is proposed that they should appoint such additional inspecting staff as they may deem necessary, expenditure on this account being met by central revenues. It is felt however, that such additional staff should not themselves be wholly employed on this work, as better results are likely to be achieved if this work is entrusted to the ordinary inspecting staff, who could be assisted in their ordinary duties by the additional staff. It may be desirable to appoint one whole-time officer in the office of the Director of Public Instruction to maintain close touch with the technical recruiting organisation, and to co-ordinate and supervise propaganda in schools and colleges. If the Government of Madras/etc. desire to appoint..

appoint such an officer, the Government of India would be prepared to meet the expenditure incurred. Such an officer if one is appointed should work in the closest co-operation with the Director of Publicity and Recruiting (under the Labour Department) and the Publicity Officers appointed in most Provinces under him, so as to ensure that all Publicity and propaganda are directed to the same ends. The ground for propaganda in schools needs careful preparation and it should be borne in mind that not only the students but also their parents will need persuading; the latter can probably be best persuaded by teachers of high schools. It is important that boys should be approached in schools at the most opportune stages, such as when they would otherwise be likely to look for some other employment.

6. As regards colleges, the Government of India are of the opinion that the best agency is that of Principals and Professors and would again suggest the issue of a strong directive from the Director of Public Instruction. The lines of propaganda in colleges should be similar, though not necessarily identical, to those adopted in schools. Propaganda should be confined to the first and second year students in the colleges, as those about to graduate are not likely generally to volunteer for being trained as technicians.

7. It is vital that all those who approach schools or colleges must be fully acquainted with the rates of pay and other conditions of service of technicians. The importance of equipping the inspecting and educational staff with this knowledge in a readily digestible form, together with all available material for propaganda, can hardly be over-estimated and steps are being taken to make this available. The closest liaison between the educational and technical recruiting staff is essential and the technical recruiting organisation both under the Army and the Labour Department is being strengthened to make this possible. Orders are being issued by the Recruiting Directorate, General Headquarters, instructing their local representatives to get into immediate touch with the Chief Secretary and Director of Public Instruction Madras/etc., and the Labour Department are issuing necessary instructions to their staff to keep in touch with the Directors of Public Instruction.

8. A leaflet giving in a concise form details of the various openings in the Defence Services together with rates of pay and conditions of service; and also a brief precis of the present system of recruitment of personnel for training as technicians are under preparation and copies will be forwarded shortly.

9. The Government of India hope that the Government of Madras/etc. will see their way to press forward as quickly as possible with action as now suggested and they are confident that no effort will be spared to achieve the required results. The Government of India would greatly appreciate any further proposals which the Government of Madras/etc. may be able to offer which might help to solve the problem but would urge that in the meanwhile action on the lines indicated in this letter should not be delayed.

I am, Sir,

Your most obedient servant,

W. A. Lawrence

for Secretary to the Government of India.

WAR DEPARTMENT.
GOVERNMENT OF INDIA.
(Army Branch)

NEW DELHI, the 6th of February 1943.

To

All Provincial Governments and
The Chief Commissioner, Delhi.

Sir,

In continuation of this Department's letter No. 1030-W.4. dated the 27th January 1943, I am directed to forward three cyclo-styled copies of the various openings in the Defence Services, together with rates of pay and conditions of service, and in addition, three copies of a brief precis showing the system of recruitment of personnel for training as technicians, as undertaken in paragraph 8 of the letter under reference.

2. These papers are now being printed and it would be appreciated if the Government of Madras/etc., would intimate at an early date the numbers required.

I am, Sir,
Your most obedient servant,

Addl. Deputy Secretary to the Government of India.

- The Air Headquarters (2).

R. S. J. S.

Under Secretary to the Government of India

System of recruitment of personnel for technical branches of the ROYAL INDIAN NAVY.

1. How to apply. The prospective recruit should apply in writing or in person to the nearest Technical or Assistant Technical Recruiting Officer as shown on attached list.

or

To any Honorary or Extra Assistant Technical Recruiting Officer or paid recruiter known to the applicant or who is visiting the area where he resides.

If any doubts or difficulties arise in connection with recruitment any member of the recruiting organisation either technical or non-technical should be approached for assistance or a reference in writing, not in person, may be made to the Adjutant General's Branch (A.G.II(b)) General Headquarters, New Delhi.

2. After application. A recruit is interviewed and examined by the Technical Recruiting Officer and then undergoes medical examination. If he is selected for one of the following branches :-

Seamen and Stokers.
Communications Branch (Visual Signalling and Wireless Telegraphy)
Artificers (Engineering, Ordnance, Electrical and Shipwright).
Schoolmasters.
Radio Mechanics.

he is enrolled into the Royal Indian Navy for a period of 10 years' service (five years or less being in the Active Service and the balance in the Royal Indian Fleet Reserve). After a recruit has been enrolled he is sent to Bombay to report to the Commanding Officer, R.I.N. Depot, where he will commence his training in the branch for which he has been recruited.

On arrival at Bombay, Ratings are posted to the various training establishments according to the branch for which they have been selected at the time of recruitment.

The duration of training varies from three to ten months according to the Branch. In the case of communications, Seamen and Stoker ratings the training period is six months, whilst for artificers it is ten months.

On completion of training ratings are posted to fill active service posts in the Royal Indian Navy.

3. Pay, allowances and concessions admissible are shown in attached Appendix "A". Additional details connected with recruitment into the R.I.N. may be obtained from Technical Recruiting Officers and are contained in the special pamphlet "India's Navy".

System of recruitment of personnel for technicians in the
INDIAN ARMY.

.....

1. How to apply. The prospective recruit should apply in writing or in person to the nearest Technical or Assistant Technical Recruiting Officer as shown on the attached list

OR

To any Honorary or Extra Assistant Technical Recruiting Officer or paid technical recruiter known to the applicant or who is visiting the area where he resides

OR

To the Chairman of any of the following National Service Labour Tribunals:-

Bombay National Service Labour Tribunal, Hassan Chambers,
Parsi Bazar, Fort, Bombay.

Bengal National Service Labour Tribunal, 77-B, Park Street,
Calcutta.

Sind National Service Labour Tribunal, Karachi.
C.P. & Berar National Service Labour Tribunal, Civil
Secretariat, Nagpur.

Delhi & Ajmer-Merwara National Service Labour Tribunal, Delhi.

Madras National Service Labour Tribunal, Madras.

Bihar & Orissa National Service Labour Tribunal, Patna

Assam National Service Labour Tribunal, Office of the
Controller of Emigrant Labour, Shillong.

OR

The President, Punjab & N.W.F.P. Technical Selection
Committee, Lahore.

If any doubts or difficulties arise in connection with recruitment any member of the recruiting organisation either technical or non-technical should be approached for assistance or a reference in writing, not in person, may be made to the Adjutant General's Branch (A.G.II(b)), General Headquarters, New Delhi.

The Technical Recruiting Officer or National Service Labour Tribunal concerned will then call the applicant for interview and medical examination and will advise him regarding the trade for which he should train.

2. After application. After acceptance by the Technical Recruiting staff there are two methods of joining the Army.

Method (1). By passing through the Government of India Technical Training Scheme according to the following procedure:-

(i) Entry into a Civil Training Centre, of which there are about 400. On entering the Civil Training Centre, every trainee is required to give a written undertaking that he will, on completion of his training:-

(a) Enrol into one of the Technical Branches of the Defence Services

OR

(b) Take up employment in an Ordnance Factory or in Civil Industry (copy of undertaking attached).

N.B. The option on (a) or (b) is at the discretion of Government not of the trainee.

While at a Civil Training Centre the trainee is entitled to a monthly stipend and other concessions shown in column 3 of the attached Appendix 'B'.

(ii) After completion of a certain amount of training at a Civil Centre (generally about 1 month), a selected candidate may, without waiting until the completion of his training, elect to enrol into one of the Technical Arms of the Army. He will then become entitled to the special "Improver" rate of pay and other.....

and other military concessions as shown in columns 4 and 6 of the attached Appendix 'B'. At this stage he will be transferred to what is known as a 'CIVMIL' Centre - that is a Civil Training Centre, in which the trainees are all enrolled persons.

In some cases new entrants to the scheme who certify on application that they wish to enrol, are placed straight into Civmil Centres. Such trainees until they become eligible for 'Improver' pay are allowed pay as shown in note (d) of the attached Appendix 'B'.

(iii) Trainees in Civmil Centres are transferred to Army training units when they have attained the degree of skill considered necessary. The length of time that a trainee stays in a Civmil Centre before being transferred to an Army training unit varies from three months to a year according to the trade and the trainee's skill. When trainees are transferred from Civmil Centres to Army training units they become entitled to all the additional pay, allowances and concessions admissible to all regular soldiers (vide columns 4 or 5 and 7 of Appendix 'B'). Trainees after completion of their full military and technical training with Army training units will be drafted to an active unit.

Method (2). By direct enrolment. This applies to certain trades and certain Arms only, namely Fitter (Armoured Fighting Vehicles), Electrician (Armoured Fighting Vehicles), Electrician (Signals), Instrument Mechanic, Operator Fire Control, Operator Telegraph (line), Operator Telegraph (wire) & Operator Telegraph (Signals). In this case the recruit is entitled to the pay and concessions shown in columns 4 and 6 of the Appendix 'B' if in a Civmil Centre or those shown in columns 4 and 7 if in an Army Training Centre until qualifying as a graded tradesman on pay rates as shown in column 5.

3. Additional details connected with recruitment for the technical arms of the Indian Army may be obtained from Technical Recruiting Officers and from pamphlets which are issued from time to time.

--.V.--

UNDERTAKING.

I son of
having been selected by the Governor General in Council for a course of
training as a in hereby agree to
take and complete the prescribed training at the said training centre and
undertake on the completion of my training to enrol in a technical branch
of the Defence Services, if so directed by the Governor General in Council
or any authority acting on his behalf, or, if not so directed, to accept
such other employment (if any) in Ordnance factories or in civil industry
as may be provided for me by the Governor General in Council or any
authority acting on his behalf.

If I fail to carry out the above undertaking or if at any time during
the period of my training, I voluntarily quit such training or am dis-
charged for misconduct (including insubordination, breach of rules, habitual
absence from duty or wilful neglect of my work) of which the Regional
Inspector of Technical Training concerned shall be the sole and final
judge, I hereby promise and undertake to refund to the Governor General
in Council on demand the stipends paid to me by him.

I understand clearly that in accepting me as a trainee, the Governor
General in Council assumes no obligation whatever to find employment for
me on the conclusion of my training, and that he or any authority acting
on his behalf has full right to discharge me from the training course at
any time without assigning any reason if he thinks fit to do so.

I understand also that enrolment in a technical branch of the
Defence Services entails the liability to serve overseas, and if so en-
rolled, I shall be ready to proceed overseas if so ordered.

Dated the day of 194 .

.....
Signature of witness.

.....
Signature of candidate.

When the candidate is a minor, the following addendum should be
signed by his father, guardian or a surety:-

The Governor General in Council having at my request and with my
consent agreed to accept the above undertaking, I undertake and guarantee
that the candidate will duly perform his part of the above undertaking
and I and my heirs shall refund to the Governor General in Council the
stipends paid to the candidate in the event of the same becoming refundable
in terms of the aforesaid undertaking.

Dated the day of 194 .

.....
Signature of witness.

.....
Signature of father,
guardian or surety.

In addition training is available in 29/4 27/6 Additional concessions as in column 6.	

- NOTES:-**
- All trainees join on a stipend (consolidated) as shown in column 3. After for enrolment on Improver rate as shown in column 4. Grade III is usual remainder.
 - Rates vary according to areas as classified for dearness allowance.
 - No other grade.
 - Trainees may enrol on commencement of training and be eligible for:-
Matrics:- 38/10 p.m. plus free accommodation or Rs.23/10/-p.m. plus free accommodation.
Non-Matrics:- 33/10 p.m. plus free accommodation or Rs.18/10 plus free accommodation.

With free messing (value Rs.15/-), messing allowance Rs.3/- p.m. plus
 free messing (value Rs.15/-) plus messing allowance Rs.3/- p.m.

System of recruitment of personnel for technicians in the
INDIAN AIR FORCE

1. How to apply. The prospective recruit should apply in writing or in person to the nearest Technical or Assistant Recruiting Officer as shown on attached list.

or

To any Honorary or Extra Assistant Technical Recruiting Officer or paid recruiter known to the applicant or who is visiting the area where he resides.

If any doubts or difficulties arise in connection with recruitment any member of the recruiting organisation either technical or non-technical should be approached for assistance or a reference in writing, not in person, may be made to the Adjutant General's Branch (A.G.II(b)), General Headquarters, New Delhi.

2. After Application. Applicants after medical examination are examined by the Technical Recruiting Staff and if found suitable are enlisted into one of the trades of I.A.F. Airmen according to their qualifications. Recruits after enlistment are sent to the Initial Training Centre Walton, Lahore for initial training for a duration of 1½ to 2 months. This is to accustom them to military conditions and to adjust their civil education to Service requirements. From the Initial Training Centre Walton, Lahore, recruits are sent to a school of Air Force Technical Training where they receive training either in the trades which they have chosen or in the trades for which they appear most suitable. At the conclusion of their training in a school of Air Force Technical Training recruits are put through a trade test and in accordance with the results are classified as one of the following:-

Aircraftman 2nd class.

Aircraftman 1st class.

(If he passes with more than 60% marks)

Leading Aircraftman

(If he passes with more than 80% marks)

If a recruit fails to qualify in the trade test for any of the above classifications he will be liable for service in any other trade of the group to which he belongs. If he eventually fails to qualify in a trade test in respect of his new trade he may be required to transfer to a lower paid Group.

After completion of training the recruit is drafted to a unit of the Air Force.

3. Pay allowances and concessions admissible are shown in attached Appendix 'C'. Additional details connected with recruitment in the Indian Air Force may be obtained from Technical Recruiting Officers and are contained in a pamphlet "India Needs Experts".

TECHNICAL RECRUITING ORGANISATION.

1. Technical Recruiting Officer, Northern Area 22 Davis Road, Lahore.

No.1411-W.1.
WAR DEPARTMENT.
GOVERNMENT OF INDIA.
(Army Branch)

NEW DELHI, the 15th February 1943

To

All Provincial Governments and
The Chief Commissioner, Delhi.

Sir,

In continuation of this Department's letter No.1080-W.4. dated the 27th January 1943, I am directed to enclose two copies of a leading article concerning prospects in the Indian Air Force which appeared in "Statesman" on the 8th of February 1943, as it is considered that this may be of use.

I am, Sir,
Your most obedient servant,

Addl. Deputy Secretary to the Government of India:

No. 1411-W.1.

Copy of the above is forwarded to:-

The Labour Department (2)
The Education Health and Lands Department (2)
The Naval Headquarters (2)
The Adjutant General's Branch (2)
The Air Headquarters (2)

Ann Lane

Under Secretary to the Government of India.

PROSPECTS IN THE IAF.

The Indian Air Force is emerging from a rather troubled infancy into promising adolescence. The future seems to have become much brighter for the force and for its members. Pay is now more commensurate with the educational qualifications needed; the advantages of joining have been made more fully known; disappointment at not having the use of first-class modern aircraft has been dissipated as the flow from factories met urgent demands on the fighting fronts; and it has generally been made understood that official policy is to see that this country has the most efficient air force possible, limited in size only by the number of suitable Indians coming forward to serve in it. Lack of such numbers has lately been the trouble. There has never been shortage of daring youth of India for flying duties, but for ground staff (who have duties of great value to perform) the attractions offered were apparently insufficient to draw the class of men required. The service has now been made more beneficial from the point of view of immediate salary-earning, but satisfactory recruitment will only be obtained when the alterations become widely known.

Living has to be earned, and for every Indian family able financially to help a son there are perhaps several expecting the son, having finished education, to help the family. The honour of belonging to a force which has already won distinction on active service has not in the past helped a strained domestic budget. Aircraftmen are now getting from Rs. 60 to 110 p.m., NCOs Rs. 75 to 265, and there is promotion to commissioned rank. Despite the small size of the force about 80 officers have already been obtained from the ranks since 1940. People who, not without reason, have criticized the slow growth of the force should now perform the service of making known the present position. Besides discussing the immediate pay to be earned by young men of requisite physical and educational standards, with an opportunity of attaining any rank, those who are good enough to augment the work of air force classes at the universities, recruiting lectures and so on, by personal recommendation, might well touch upon the long-term aspect. Young men in the IAF are given a first-class technical training. Their tests are the same as those of the RAF and are recognized by the Board of Trade.

The recruit has three post-war prospects. First, continuing in the IAF. Second, joining the great civil flying services that seem destined to spring up when peace comes. Third, applying the occupation learned to some other sphere of industry where the knowledge, skill and qualifications are the same. The size of the post-war IAF cannot be guessed, nor its opportunities foretold, but of the impending expansion of civil aviation there can be no doubt and it seems obvious that radio experts, metal workers, instrument makers, photographers, electricians and others taught a trade in the force must have an opportunity better than most when their war job is done. The shortage of manpower for India's new arm, and the cause of the corresponding loss of opportunities for India's young men, is largely the fault of parents and others with influence in the matter of choice of career. Their view is too often limited to the civil service and professions. Yet always, and especially after so much destruction and postponement of production of civil requirements, the surest way of getting a good living is to be able to make or tend essential things. That dignifying ability, together with service to country, is what is offered by the IAF. By April this year the force will be 10 years old. Indians have it in their power to make it become big for its age.

No.1507-W.1.
WAR DEPARTMENT.
GOVERNMENT OF INDIA.
(Army Branch)

NEW DELHI, the 17th February 1943.

To

All Provincial Governments and
The Chief Commissioner, Delhi.

Sir,

In continuation of this Department's letter No.1080-W.4. dated the 27th January 1943, I am directed to state that owing to some misunderstanding over the term "semi-educated zone" the figures quoted in paragraph 3 of the letter under reference are inaccurate. The error is regretted. I am to request that the following paragraph may be substituted for paragraph 3 in this Department's letter No.1080-W.4. dated the 27th January 1943. The alterations are underlined.

"At present the average monthly intake of recruits for training as technicians for the Army, Navy and Air Force in the "matriculate zone" is approximately 630 a month against the present requirement of 2,100 and a probable future requirement of 3,000 which may rise as high as 4,000, while the intake in the "semi-educated" zone is in the neighbourhood of 4,700 a month against the present requirement of 6,000 and a probable future requirement of 6,700. Recruitment in the "matriculate" zone must, therefore, be increased approximately sixfold and in the "semi-educated" zone nearly 50 per cent. These figures indicate the magnitude of the problem which faces the Government of India, the rapid and successful solution of which is essential if the fighting forces particularly the Indian Air Force are to be expanded in accordance with the needs of the situation".

WAR DEPARTMENT.
GOVERNMENT OF INDIA.
(Army Branch)

NEW DELHI, the 18th February 1943.

To

All Provincial Governments and,
The Chief Commissioner, Delhi.

Sir,

In continuation of this Department's letter No.1080-W.4. dated the 27th January 1943, I am directed to state that the Labour Department of the Government of India are making arrangements to distribute copies of the leaflet referred to in paragraph 8 of the letter under reference to all Matriculation and Intermediate students at the time of their examination through the Superintendents of examination centres, and I am to request that this fact may be taken into consideration when the Government of Madras/etc., send in their demands for leaflets, as suggested in paragraph 2 of this Department's letter No.1224-W.1. dated the 6th February 1943. No demands have yet been received for leaflets, but if in fact the Government of Madras/etc., have already sent in their demand, the Government of India would be grateful if they would now intimate how much this demand should be reduced in view of the distribution which is to be made by Labour Department.

I am, Sir,
Your most obedient servant,

Addl. Deputy Secretary to the Government of India.
